

FAQ

Most frequent questions and answers

How does it work?

The simplest way to explore the magic of Tonio is too try it yourself. Follow the [link](#) and find out how Tonio works.

Why Tonio?

Tonio is the best way to receive information via audio directly on the smartphone.

Is Tonio ready to use?

Yes, Tonio is already applicable! The prerequisite is that the radio or television station supports the service and thus broadcasts the coded information.

On which operating systems is Tonio available?

On which operating systems is Tonio available:

Tonio is available for iOS (Apple Smartphones, Tablets) and Android Devices. You can install the app here: <https://www.tonio.com/install>. The implementation of a Windows Phone App is not planned.

Does the Tonio App store the microphone data?

The Tonio App uses the microphone to extract information from the radio or television signal. This is done in real time in the app. Nothing is recorded or sent to the Internet. Your private conversations remain private.

Which distribution channels are supported by Tonio?

Our technology works through all digital and analog distribution channels. Therefore, no problem if the channel is broadcast via FM, DAB(+), cable, satellite or Internet stream.

Can Tonio be integrated into any existing app?

Yes, Tonio can be seamlessly integrated into any existing app. You don't need an additional app in this case.

Do I need an Internet connection to use the Tonio App?

Currently, you need a mobile data connection or active WLAN connection to display the content that reaches your smartphone via the audio signal.

In one of the next versions, it is planned that various contents will already be stored in the app. Then you don't need an Internet connection to use Tonio. The audio signal is then used to automatically unlock and display the content in the app.
